Visual Design Studio
Since 1997

Profile

A visual design studio based in Tokyo, Sendai, and London. We create diverse design work that transcends existing media and categories—from brand concept films that capture a company's unique worldview to installations for commercial spaces and urban environments, as well as application design and user interfaces developed in collaboration with manufacturers. We also actively produce original art and products and exhibit in museums and galleries worldwide. With each creator's individual sensibility as our foundation, we continually pursue the creation of visual expressions that illuminate new perspectives and stir people's hearts.
